Indicem systematicum

addit

F. C. Kielsen,

quondam in schola metropolitana magister primarius.

Hafniae 1835.

Sumptibus *Christiani Steen*, bibliopolae et chartopratis hafniensis;
typis *Bianco Luno & Schneider*.

Quoad *Piscium* ordines celeberrimum *Blumenbach*; quoad vero genera speciesque immortalem *Linnaeum* (editionem XIII^{am} ejus Systematis Naturae comparata) sumus secuti. Species, parenthesi inclusae, in Systemate Linn. desiderantur; quare eas servavimus, quibus usus est auctor in textu danico, aeneas hujus operis tabulas illustraturo. Has etiam adjecimus, ubi differunt a Linnaeanis.

In hoc indice *Branchiostegum* coccum Blumenb. (*Myxine glutinosam* Linn) quidem commemoravimus; sed tabula citata pertinet ad volumen operis hujus, quod vermes complectitur, inter quos Linnaeus posuerat.
